MUTANDOR®

MUTANDOR®

Extreme Exclusive B.V. is a company in high-tech solutions & design. Our product portfolio consists of highly innovative products which can be completely customized to the wishes of our clients. Currently our product portfolio consists of:

MUTANDOR

Moving house front

Glass elevator

Tender launch system

Our mission is to stay innovative at all times, therefore please do not hesitate to contact us with any problems that asks for high tech solutions & design.

MUTANDOR®

MUTANDOR®

The Latin phrase “mutatis mutandis” literally means; “by changing those things which need to be changed”. The new terrace-to-building system of Extreme Exclusive B.V. borrows its name from this concept.

Founded in 1993 in The Netherlands, Extreme Exclusive B.V. has years of experience with developing high-tech solutions and design. Whether you desire a glass elevator, a moving house front or a tender launch system for your yacht - all products are known as innovative, exclusive and custom-made, suiting the exact preferences of each individual client.

MUTANDOR®

MUTANDOR®

With more than ten functions, the MUTANDOR system brings comfort and cutting edge technology right to your home. A terrace can be converted into a complete indoor swimming pool after simply pressing a button. Within a matter of minutes; walls (housefronts) will rise up from beneath, a roof will be revealed and the floor will be lowered to expose a swimming pool. Being equipped with window frames, special glass, doors, heating and lighting - it is no understatement that a building can be erected at the command of the owner.

MUTANDOR®

MUTANDOR®

This advanced system can be used as a terrace, for wind-screens, a party hall, a podium, a pool enclosure, a moveable pool floor and so on. For almost all these features you can chose the options “open air”, “partly in-house” (partly covered) or “full in-house” (closed roof). Also other combinations are possible, but the bottom-line remains that it can all disappear out of sight whenever this is requested.

MUTANDOR®

MUTANDOR®

Extreme Exclusive B.V. has developed the MUTANDOR System as a response to the increase in demand for luxury outdoor equipment. The multifunctional system is ideal for those who seek recreation and comfort at home without being hampered by unpleasant weather conditions or the limited availability of space. Furthermore, it is an attractive solution for those intending to extend the swimming season, while simultaneously minimizing the impact on the garden and its view.

MUTANDOR®

MUTANDOR®

An important part of the technical components of the MUTANDOR, such as the guiding and drivers, the heating system, the storage of the roof panels and the hydraulics with control box are all situated in the cellars.
